JOHN AARON MENDOZA BRANZUELA

87801008 | johnaaronmb@gmail.com | linkedin.com/in/john-branzuela | github.com/johnaaronmendoza
https://portfolio-site-lh1v.vercel.app

Detailed Computing Science student (SIT x University of Glasgow) with hands-on experience bridging business requirements and technical solutions. Proven track record in stakeholder engagement, UAT execution, and end- to-end Agile delivery across 4 software projects and a corporate internship. Contributor to the SGD $10,000 grant-winning GreenLoopFarms initiative. Certified in AI literacy, deep learning, Docker, and Kubernetes. Projects can be found in online portfolio.

WORK EXPERIENCE

Sembcorp Solar Singapore | Digitization Analyst Intern Oct 2020 – Jun 2021

- **Stakeholder Engagement:** Facilitated virtual onboarding sessions for 10+ participants per session, translating operational workflows into digitised system processes for internal teams and contractors.
- **Requirements and Feedback Management:** Ran structured bi-weekly feedback sessions with cross-functional teams to capture and document user requirements; translated inputs into formal change requests and coordinated with vendors to prioritise and implement enhancements.
- **UAT and Quality Assurance:** Designed and executed User Acceptance Testing (UAT) for the Momens CRM platform; managed defect backlogs in Trello to ensure system stability and timely resolution ahead of go-live for SolarNova 3 and other major deployments.
- **Process Documentation:** Produced training materials, process guides, and deployment documentation to support the company-wide CRM rollout across Projects, C&I, and SolarNova divisions.

EDUCATION

Singapore Institute of Technology x University of Glasgow Sep 2024 – Apr 2027
Bachelor of Science with Honours in Computing Science

Nanyang Polytechnic Apr 2018 – Mar 2021
Diploma in Electrical Engineering with Eco-Design

- Admitted to the Director's List, SEM 1 – AY2020/2021 (awarded to top-performing students each semester)

PROJECTS

Fire Safety Drill Companion | Kotlin, Jetpack Compose, ARCore, TFLite, Room DB 2026

- Delivered a native Android fire evacuation training app across 3 Agile sprints with sprint planning and retrospectives; achieved approximately 80% test coverage and a System Usability Scale (SUS) score of 79/100, validating requirements were met from a user experience standpoint
- Led UAT planning and test case design for 5 core modules including AR corridor navigation, on-device ML extinguisher classification, and dynamic Dijkstra pathfinding; defined acceptance criteria and managed a 9-item sprint backlog, delivering all items plus 6 bonus enhancements.
- Produced sprint documentation and feature specifications to support cross-functional delivery across algorithms, AR, and mobile UI workstreams; maintained requirement traceability from user story through testing

Singapore Cancer Society Awareness Platform | React 19, TypeScript, Supabase, Tailwind 2026

- Gathered and documented functional requirements from Singapore Cancer Society stakeholders across 7 Agile sprints, translating outreach goals into technical specifications for a multilingual visual novel engine deployed at community booths.
- Authored user stories and acceptance criteria for 4 question types, 4-language support (EN/ZH/TA/MS), and a no-code admin panel enabling non-technical SCS staff to create and manage stories independently.
- Participated in sprint planning, reviews, and retrospectives; maintained a full requirement traceability matrix from business goal through to acceptance testing across delivery lifecycle

SilverLink SG | React, gRPC, Docker, Kubernetes, PostgreSQL, Prisma ORM 2025

- Defined system requirements and acceptance criteria for a cloud-native platform connecting seniors and youth volunteers through skill-sharing, micro-volunteering, and live events across 4 gRPC microservices.
- Coordinated cross-functional delivery across frontend, backend, and DevOps workstreams, ensuring alignment between stakeholder goals and technical implementation throughout the project lifecycle.

UWB Indoor Localization | Python, scikit-learn, Pandas, NumPy, Matplotlib 2025

- Built and evaluated a full ML pipeline classifying LOS/NLOS UWB signal paths across 41,996 structured samples from 7 indoor environments; SVM-RBF model achieved 89.61% accuracy and 0.9612 ROC-AUC.
- Conducted structured data analysis including PCA dimensionality reduction, feature engineering, and comparative model evaluation; documented findings in a formal analytics report aligned with project requirements.

GreenLoopFarms 2023

- Contributed to the business strategy and digital presence (greenloopfarms.com) of a Singapore hydroponic urban farm startup that won a SGD $10,000 NYP JumpStart Grant; co-prepared the pitch deck and business model presentation for a panel of industry investors

LEADERSHIP EXPERIENCE

Student Facilitator | University of Glasgow Hackathon SG 2026

- Managed event logistics and participant registration for 70+ attendees in collaboration with the organising committee.

Class Chairperson | Nanyang Polytechnic 2017 – 2020

- Served as the primary liaison between students and lecturers; fostered a collaborative and inclusive class environment.

SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks and Libraries:** React, Next.js, Node.js, Flask, Kotlin (Android), scikit-learn, Pandas, NumPy
- **Tools and Platforms:** Git, Docker, Kubernetes, AWS, JIRA, Trello, Confluence, Microsoft Project, AutoCAD
- **Methodologies:** Agile/Scrum, SDLC, UAT/SIT, Requirements Gathering, User Stories, Process Documentation
- **Engineering:** Solar PV Systems, Single-Line Diagrams, IoT Sensors, PLC

CERTIFICATIONS

AI4I – Literacy in AI, AI Singapore	Mar 2026
Fundamentals of Deep Learning, NVIDIA Deep Learning Institute	Mar 2026
Kubernetes Fundamentals, Dell Technologies	Dec 2025
Docker Fundamentals, Dell Technologies	Dec 2025

HONORS AND AWARDS

Director's List, Nanyang Polytechnic SEM 1, AY2020/2021

- Earned by top-performing students each semester based on academic achievement across all modules.

NYP JumpStart Grant Winner (SGD $10,000) 2020

- Awarded seed funding for GreenLoopFarms; pitched business model and sustainability impact to a panel of industry investors.

Internship Distinction | Sembcorp Solar Singapore 2021

- Led the digital rollout of the Momens CRM platform and earned a contract extension for exceptional technical aptitude and independent problem-solving.

Application for NextLabs, Product Business Analyst Intern

Dear Hiring Manager,

My name is John Aaron Mendoza Branzuela, and I am a Computing Science undergraduate at the Singapore Institute of Technology (SIT). I am writing to express my strong interest in the Product Business Analyst Intern role at NextLabs.

Product BA work is where I have been spending most of my time, so NextLabs is a natural fit for me.

At Sembcorp Solar, the core of my role was keeping business stakeholders and the technical team aligned on a live CRM deployment. I ran requirements sessions, wrote change requests, and executed UAT before go-live. When those two sides get out of sync on a project, everyone finds out the hard way. I got good at preventing that.

IIn my project work, I have operated as the requirements person on real software deliveries. For the Singapore Cancer Society awareness platform, I translated stakeholder outreach goals into technical specifications across seven Agile sprints, maintained a full requirement traceability matrix, and authored acceptance criteria for a multilingual content engine deployed at community booths. For SilverLink SG, a cloud-native microservices platform, I defined system requirements and acted as the coordination point between frontend, backend, and DevOps workstreams when scope questions came up.

NextLabs builds security and data management products where requirements precision matters more than in most software contexts. A vague requirement in a DRM or policy enforcement product is a real problem, not just a delay. That is the kind of environment where careful BA work has actual consequences, and that is the kind of work I want to do.

I am familiar with JIRA and Confluence, comfortable across the Agile delivery lifecycle, and I have enough technical depth to understand what I am asking developers to build.

As part of my Integrated Work Study Programme (IWSP) at SIT, I am available for a full-time internship from 31 August 2026 to 9 April 2027. Thank you for your time and consideration. I would welcome the chance to discuss further.

JOHN AARON
